Getting started with web components

Introduction
What are web components? Why are they awesome? All the answers in this article.

Polyfills
Use web components today and have them work in all major browsers.
paper-fab v1.2.1

A material design floating action button

Material design: Floating Action Button

paper-fab is a floating action button. It contains an image placed in the center and comes in two sizes: regular size and a smaller size by applying the attribute mini. When the user touches the button, a ripple effect emanates from the center of the button.

You may import iron-icons to use with this element, or provide a URL to a custom icon. See iron-iconset for more information about how to use a custom icon set.

```html
<paper-fab icon="favorite"></paper-fab>
<paper-fab mini icon="reply"></paper-fab>
<paper-fab label=""></paper-fab>
```
yes, but...
no such thing as one-size-fits-all
