@desktopprapp your wallpaper app looks pretty cool. would love an invite.
Hey,

I'm a writer for Lifehacker.com, and we love the look of Desktoppr--but we don't generally write about products in closed beta unless we can get at least 2,000 invites for our readers. Is there any way we could set something up to give expedited access to some of our readers?

Could be all the Lifehacker traffic, but after refreshing past a couple 404's and breaks, even when it does work it's excruciatingly slow. I appreciate all the cute caveats about the site being beta and free cat photos, but really, this isn't even beta...It's a badly working wordpress theme containing some dubiously obtained web images. I would have made it into Lifehacker long ago if I knew this was all it took. I think Whitson is a sucker for pretty pictures!
